Pharma1humanitas holdings ltd believes in the parallel between the Vitruvian Man and modern aesthetic medicine, which is based on the concept of harmony & proportion. Just as Vitruvius defined the human body as a perfect set of proportional relationships, aesthetic medicine, through the use of fillers and advanced technologies, works to improve the balance and beauty of the human body, respecting its natural symmetry. Technology, combined with the understanding of proportion and art, allows for surgical results that appear natural, but are scientifically perfected, making the concept of beauty more attainable and precise than ever.

Pharma1humanitas holdings ltd sells hyaluronic acid-based dermal fillers,hi-tech beauty equipment and Botox sourced from international factories & laboratories.In this sector our company supply pre-filled syringes or vials.Therefore requires our specialized advice to ensure that the product meets the safety and efficacy requirements.The products that we sell respect the entire manufacturing process, in fact it follows all legal regulations related to health, distribution of medical devices and aesthetic products.

1. Quality and certified products

- **Hyaluronic Acid:** It is essential to know how the different types of hyaluronic acid-based fillers work, such as the influence of the density of the product, the duration of the effect and the indication of each type of filler (for example, for volume, for superficial or deep wrinkles).
- **Botox:** Although Botox is not based on hyaluronic acid, it is a complementary aesthetic treatment. Botox (botulinum toxin) works by relaxing the facial muscles to reduce dynamic wrinkles, and it is essential to know how to correctly combine the two treatments.
- **Pre-filled Syringes & Vials:** Pre-filled syringes are often more convenient and safe for use by professionals, while vials require careful handling to fill the syringes. Both formats must be offered with precise instructions on their use.

2. Regulations and Standards

- **CE Certification:** Fillers and Botox must be produced in compliance with European Union (CE) regulations or the standards required in the country of distribution. Each product must be accompanied by documentation attesting to its quality and safety.
- **Legal Distribution:** It is necessary that the products are distributed to certified professionals (clinics, hospitals, pharmacies, aesthetic doctors, dermatologists, etc.) who have the necessary training for the use of these treatments and products branded pharma1humanitas hodings ltd.
- **Product Traceability:** Each syringe or vial must be traceable through a management system to ensure patient safety and prevent any errors.

3. Target Customers

- Wholesale warehouse,clinics, hospitals, pharmacies, aesthetic doctors, dermatologists
- Beauty Centers: Some beauty centers with qualified staff are also interested in our products

Pharma1humanitas holdings ltd beauty division also supplies beauty equipment and designs surgical beauty centers and spas:

1. Supply of Beauty Equipment

Beauty equipment for beauty centers & spas.

Skin care equipment:

- Facial cleansing machines (for example, microdermabrasion, chemical peeling).
- Intense pulsed light (IPL) treatments for hair removal and acne treatment.
- Aesthetic laser for hair removal, reduction of signs of aging.

Body equipment:

- Professional massagers for relaxing or reshaping treatments.
- Non-invasive liposuction equipment (for example, cryolipolysis, cavitation).
- Laser for weight loss

Furniture and accessories:

- Massage beds and reclining chairs.
- Trolleys and furniture for storing equipment and cosmetic products.
- Professional mirrors and adequate lighting to ensure high-quality treatments.

Email: pharma1humanitas@gmail.com

Aesthetic elements:

The choice of materials should reflect a relaxing and luxurious environment.

Use high-quality materials such as stones, wood, glass and soft fabrics to create an atmosphere of well-being.

Lighting: Lighting should be adaptable

Cutting-edge technologies:

Air purification systems to ensure a healthy environment.

3. Sustainability and Innovation

Innovation in technology, such as the use of artificial intelligence systems for monitoring treatments

4. Safety and hygiene

In environments such as surgical spas and beauty centers, hygiene is essential.

We Provide:

Autoclaves for sterilizing instruments. Highly efficient disinfection systems for surfaces.

Our company sales also healthy gemstones in spas and beauty centers can elevate the aesthetic appeal, ambiance, and even contribute to wellness and beauty treatments. These gems are believed to offer a range of physical, emotional, and spiritual benefits, aligning perfectly with the relaxation and rejuvenation goals of spas and beauty centers.

DEVICE

Mask with light input that stimulates the formation of collagen.

- Allows irradiation on the face by stimulating collagen growth factors.
- Allows for higher effects than those found with other methodologies.
- Allows to subject the face to a stimulating effect of collagen.
- Improves elastic fibers and skin firming.

A SERVICE WHAT

It is a light emitting device with an infrared heat component that stimulates the formation of collagen.

AS IN OPERATION

It is a device consisting of a control console and a mask which, through the use of infrared lamps with partial heat generation, stimulates the production of collagen on the face, together with a patch imbued with growth factors and peptides

LIFTING LASER BEAUTY LINE EQUIPMENT

Non-invasive generator of impulsive laser for the superficial and selective transport of cosmetic active ingredients for the face and body.

Lifting laser beauty line equipment is a type of advanced technology used in aesthetic treatments to improve the appearance of the skin, primarily targeting lifting, tightening, and rejuvenation.

- Improves the effectiveness of an aesthetic treatment.
- Promotes the delivery of greater quantities of active ingredients than other methods.
- Absence of side effects.

AESTHETIC MESOTHERAPY

Programmable impulse current generator that allows face and body electroporation treatments with an absolutely bloodless methodology.

- Allows the delivery of active ingredients directly into the area to be treated.
- It allows to achieve higher effects than those obtained with other methodologies, without causing any damage.
- It is absolutely painless.
- Allows ions to bind to certain plasma proteins, resulting in an increase in residence time.
- Improves the trophism of superficial tissues.

WHAT IT'S FOR

It is one of the most important technological systems in the aesthetic sector, non- invasive, without risks and side effects. The use of non-invasive mesotherapy increases the transport of molecules of active ingredients through the skin, exponentially amplifying the effects and results of the treatments.

HOW DOES IT WORK

It consists in the application of short special pulses that act on the intercellular spaces causing molecular changes, which lead to the formation of ultramicropores that temporarily increase skin permeability.

During this skin permeability, Mesotech selectively transports cocktails of dedicated active ingredients directly to the face and / or body areas to be treated.

TECHNICAL FEATURES

Power supply: 220/240 V Frequency: 50/60 Hz.

Handpiece current when empty: 28 Vpp

Ha-Pnd- piece current 1K 1: 18.5 Vpp Handpiece current 500 : 13.5 Vpp Dimensions with packaging: 37x37x110 cm Equipment dimensions: 32x32x105 cm Weight: 13 kg.

Pressotherapy PHARMA ONE equipment consisting of a digital control unit with LCD display and a costume consisting of leggings, abdominal band and arm sleeves.

- Stimulates both lymphatic and venous return circulation.
- Promotes the reabsorption of interstitial fluid in combination with bandages.
- Improves drainage by acting on lymphatic vessels and ganglia in combination with bandages.
- Analgesic and relaxing effect thanks to the reabsorption of edema

WHAT IT'S FOR

The pressure massage is an alternative to manual lymphatic drainage.

It is based on pressure exerted on the legs, abdomen and arms with the aim of activating the venous blood return, thus favoring the reabsorption of edema and interstitial fluid.

HOW DOES IT WORK

It is a compression system managed by the control unit, which has the function of infusing air into the parts of the costume where the areas of the body to be treated are inserted (legs, abdomen, arms).

TECHNICAL FEATURES

Power supply: 220/240 V. Frequency: 50/60 Hz. Pressure: 195-240 mmHg

Pressure: 0.26-0.32 bar Max working time: 60 minutes Power: 75 W

Dimensions with packaging: 61x45x15.5 cm Appliance dimensions: 41x24x13 cm Weight: 14 kg.

Email: pharma1humanitas@gmail.com

The most powerful and effective monopolar, bipolar and fractional radiofrequency ever for the treatment of skin laxity of the face and body.

- Noticeable results already from the first sessions. or
- Firmer skin, lifted cheekbones, plumped wrinkles, redesigned face oval.
- Improvement of post traumatic skin texture (acne, scars, stretch marks).
- Increased flow of oxygen and nutrients to the tissues.

WHAT IT'S FOR

Radiofrequency is simply the most advanced combined f system divided into a revolutionary technology for the treatment of skin laxity of the face and body. The most effective technology that allows you to combine different treatment modes in a single device: monopolar to treat the deep dermis with 2 different frequencies, bipolar for an immediate lifting effect, fractional to lift cheekbones, plump wrinkles and redesign the oval of the face. Unique power and performance, for results that leave their mark.

HOW DOES IT WORK

Radio frequency uses the principle of capacitive and/or resistive energy transfer in biological tissues: this means that the energy induced at specific frequencies causes a rapid rise in temperature. This deep and uniform action of heating produces a lifting effect due to the shrinkage of collagen fibers, at the same time stimulating the fibroblasts to produce new ones. The fractional transducer, on the other hand, intermittently emits 6 million bursts of energy per second split into a matrix of small dots. The temperature is raised for a very short period of time to effective values for a redefinition of the oval of the face and décolleté, the lifting of cheekbones and eyebrow arches with a general improvement in skin firmness.

PROFESSIONAL PHOTOEPILATION

The innovative Laser Diode represents the new frontier of laser technologies which, in addition to the photo-epilation treatment, offers the possibility of carrying out photo-biostimulation sessions for skin regeneration and to prepare the tissues to receive hair removal treatment.

- The light emitted by the laser is transformed into thermal energy which is absorbed by the bulb up to inhibit the production capacity of the hair, thus obtaining an effective and permanent hair removal.
- The high energy delivered by the laser and the depth of penetration, reached by the wavelength at 808 nm, allow the treatment to be carried out even if the hair is not visible but still inserted in the bulb.
- Thanks to the specificity of the wavelength, phototypes from I to V can be treated in a safe and comfortable way.
- Also effective for white and blond hair.

WHAT IT'S FOR

It is a dual function equipment:

- **Photo-epilation**
- **Photo-biostimulation.**

HOW DOES IT WORK

The equipment has a double system for cooling the skin in the treated area before, during and after the release of laser energy, for comfortable and effective treatments. The latest generation diode has a window positioning and front emission. The technology, combined with the cooling system integrated in the handpiece, guarantees less dispersion of the thermal gradient generated by the passage of light and makes it stable the wavelength emitted. The laser beam adjustment parameters are processed by the device automatically by selecting the customer's phototype, the type of hair, the color of the hair and the area. In case you want to customize the treatment, the possibility for the operator to act on the parameters by varying frequency, duration and power
